Travel Immunization Campaign

Comprehensive travel health program including travel consultations

- Patient education on pertinent health issues for the destination country
- Administer immunizations and dispense medications for diseases that are endemic to the destination area

Traveling abroad?
Make Walgreens their first stop.

Our comprehensive **travel consultation** includes **immunization** and **medication** recommendations, a travel evaluation and a personalized, destination-specific travel report.

Before visiting different parts of the world, travelers need to prepare to stay well. Utilizing published travel guidelines that are updated daily, our pharmacists are specially trained to provide your employees with valuable travel health information that will help them have a healthy, productive and safe trip.

New service!

In addition to dispensing the prescribed medications, our immunization-trained pharmacists can also administer many immunizations — including those recommended by the CDC for safe travel.

By partnering with Walgreens, you can protect your employees (18 years and older) at little or no cost to them through one of our many customized programs, conveniently tailored to your needs.

See your Walgreens representative for more details.

*Available at select locations and based on state pricing. Travel consultation, immunizations, prescription medications and over-the-counter products sold separately. †Prescription subject to availability. See your pharmacist for details. ©2013 Walgreens. All rights reserved.
