

# UNINSURED AND UNDERINSURED ADULT VACCINE PROGRAM

---

Miriam Muscoplat, MPH  
Epidemiologist  
Minnesota Department of Health

## Background

- Vaccines for uninsured and underinsured children are covered by the Vaccines for Children Program
- No federal program exists to cover uninsured and underinsured adults

## Background

- Goal of new program is to stabilize vaccine availability while taking into account continued budget challenges
- Designed to offer consistency in clinic participation and to enable local flexibility regarding population served
- 3 year program (January 2011-September 2013)
- Vaccine (not money) awarded to selected facilities

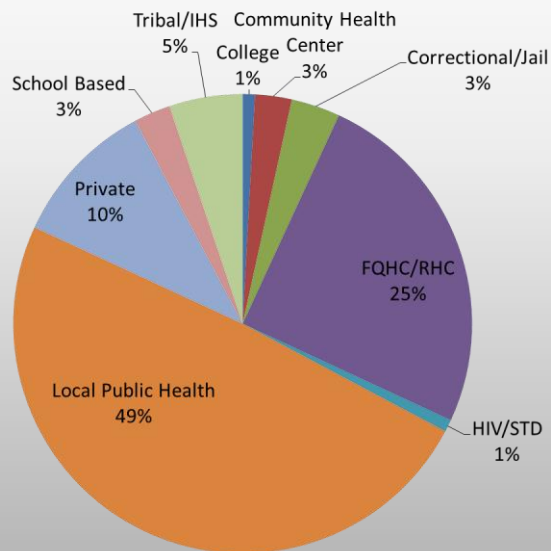

## Clinic Selection

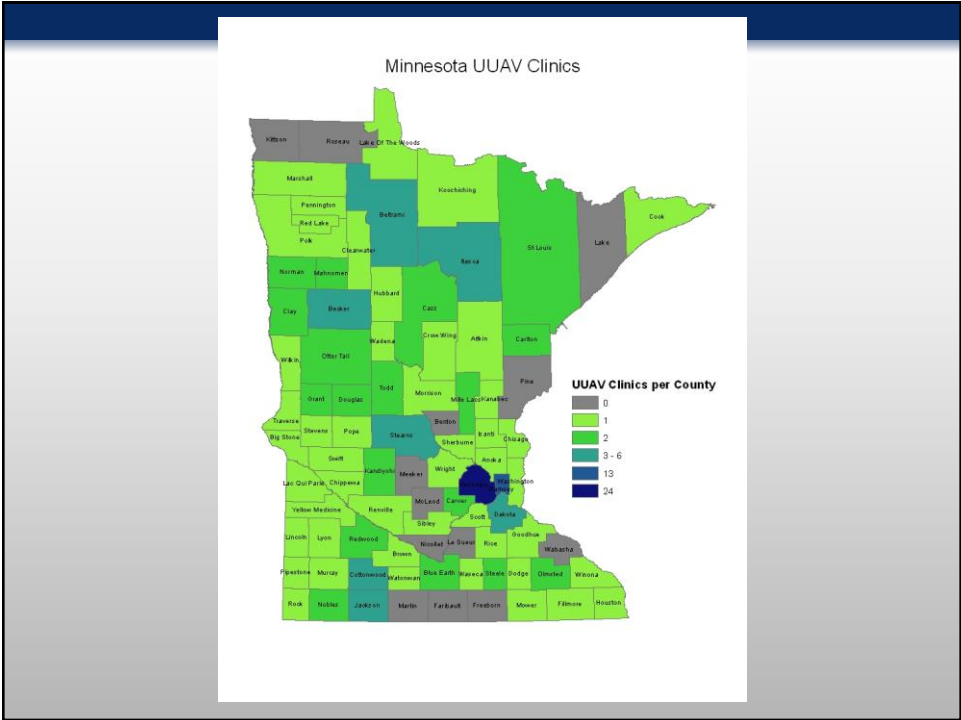

- Requested applications from any clinic or organization that regularly sees uninsured or underinsured adults
- Clinic Prerequisites
  - Must already regularly immunize uninsured and underinsured adults
  - Must be a safety net organization for uninsured and underinsured adults
- Open to any kind of organization or provider
- Received over 160 applications requesting a total of \$10 million of vaccine over the three year period

## UUAV Clinics

- 109 clinics (156 total sites) selected and awarded vaccine
  - Selected facilities include local public health, community clinics, Tribal Health/IHS, correctional facilities, FQHCs, RHCs, school located clinics, private clinics
- Selection Criteria included:
  - Duration of the organization's current adult immunization program
  - Percentage of uninsured and underinsured adult patients
  - Planned outreach to the broader community
  - Geographic representation to assure a more even distribution

## UUAV Clinics

# UUAV Clinic Finder

**Uninsured and Underinsured Adult Vaccination Clinics**

Search for clinics with free vaccine for qualifying uninsured and underinsured adults.

Patients should **call the clinic** for more information prior to going to the clinic. Patients may be charged a vaccination administration fee (up to \$20.00) and/or a clinic visit fee (varies by site). There will be no cost to you for the vaccine.

- [Where can health professionals get information on vaccinating adults?](#)
  - [How can I make vaccination a more routine part of my practice?](#)
  - [How can I educate my patients about vaccines?](#)
  - [How can I help my patients afford vaccines?](#)
  - [How can I determine which vaccines my patients have already had?](#)

### Where can health professionals get information on vaccinating adults?

- ▶ **Adult Immunization Schedules**  
Updated annually, these schedules contain all the information you will need to determine your patients' vaccination needs.
- ▶ **Adult Immunization Initiative**  
The American College of Physicians offers a free adult immunization webinar series, the ACP Guide to Adult Immunization, the ACP Immunization Advisor app for iOS devices, and an RSS feed of adult immunization news. Attention: Non-MDH link.
- ▶ **Adult Immunization CME Learning Center**  
Sponsored by the Infectious Diseases Society of America, this Medscape site contains continuing education presentations on many topics related to adult vaccination. The site is free to use, but registration is required. Attention: Non-MDH link.
- ▶ **PROTECT Online Webinars**  
CE/CME credits are available for several free presentations pertinent to adult immunization. Attention: Non-MDH link.
- ▶ **Bringing Immunity to Every Community**  
The American Nurses Association presents this free eLearning course, which provides CE credit. It covers vaccine safety and vaccine-preventable diseases in general and is valid through November 29, 2012. Attention: Non-MDH link.
- ▶ **Association for Prevention Teaching and Research (APTRe)**  
"Immunization: You Call the Shots" covers immunization generally, and

# MIIC Training and Enhancements

## Moving Forward

- New cycle of program will begin in October 2013
- Working with partners to spread word about application
- Determining how we will maintain program with funding uncertainties
