

David A. Nace MD, MPH
Director of Long Term Care (LTC) and Influenza Programs
Chief of Medical Affairs
University of Pittsburgh Medical Center Senior Communities

Dr. Nace is a geriatric medicine physician at the University of Pittsburgh. He serves as the Director, Long-Term Care (LTC) and Influenza Programs for the Division of Geriatric Medicine and is the Chief of Medical Affairs of UPMC Senior Communities, an 18 facility LTC network in Western PA.

Dr. Nace's clinical and research interests focus on the LTC setting and target prevention and management of influenza, improving antimicrobial stewardship, and the detection and prevention of medication errors. He is an investigator on a number of federally funded and private foundation grants. He is a member of the ACIP Hepatitis B Work Group, the NQF Adult Immunizations Quality Gap Analysis Advisory Group, and the project team pilot testing a CDC endorsed NQF measure addressing healthcare worker influenza immunization rates. He also serves as Co-Medical Director on the RAVEN project, a CMS Innovation award attempting to reduce unplanned admissions from LTC.
