

Anne Schuchat, Director, National Center for Immunization and Respiratory Diseases – apologies to Paul Simon  
*Welcome for May 13, 2014 – National Adult Immunization and Influenza Summit – Atlanta, GA*

The problem was all inside our heads  
I said “Oh, gee”  
The answer is easy if we  
Take it logically  
Now let me try to help you in your search  
To be germ free  
With fifteen ways  
To get your vaccines

You can get them at **work**, Kirk  
Head to the **mall**, Paul  
Try at the **grocery**, Rosalie  
Just be disease free  
Go see your **doc**, Brock  
Or the **pharmacy window**, Melinda  
Stop in the **airport**, Mort  
Listen to me

Because it grieves them so  
Who cough or ache in pain  
Develop cancer, liver failure or  
Who never walk again...  
But now there is prevention  
Bear with me while I explain  
The fifteen ways  
To get your vaccines

You can get them at **school**, Jewel  
Or at the **gym**, Tim  
Back in your **dorm**, Norm  
Seriously  
Or go to the **store**, Thor  
Stop by the **health fair**, Claire  
Try this **hotel**, Mel  
Don't you now see?

They said prevention costs  
Might keep you up at night  
But through the ACA I think  
A fix is now in sight  
So once consumers realize  
They do not need to fight  
With fifteen ways  
To find their vaccines, yes fifteen ways to get their vaccines
