

Samuel F. Stolpe, PharmD
Senior Director of Quality Strategies
Pharmacy Quality Alliance (PQA)

Samuel F. Stolpe works with PQA, a quality organization that develops scientific methods of measuring safe and appropriate medication use for large patient populations. Mr. Stolpe leads PQA's efforts in capturing the voice of the patient in PQA's measurement development process through PQA's Patient Advisory Panel. He also serves as the PQA staff liaison to the PQA Adult Immunization Task Force. Mr. Stolpe is responsible for directing PQA's research projects and educational initiatives. His most recent work has been focused on the impact of medication synchronization in community pharmacies, and pharmacist use of motivational interviewing techniques at the point of dispensing.

Mr. Stolpe's work on PQA educational initiatives includes oversight of the Academic Affairs Committee, the PQA Ambassador Program, and the Educating Pharmacists in Quality (EPIQ) training program. He established and serves as the director of the PQA Fellowship program. His ongoing work outside of PQA includes an adjunct faculty appointment at Howard University, where he teaches health policy, as well as continued professional engagement as a community pharmacist. He is currently completing a Master's in Public Health at Harvard University.
