

PASSPORT HEALTH®

**Vaccines on Demand
UberHEALTH**

Passport Health – Who are we?

Vaccination provider with 22 years of expertise

Travel vaccines are our “bacon and eggs”

Corporate wellness is a large and growing focus

Broad clinic footprint allows us to serve clients in nearly any North American location

Large nurse network and the ability to quick ramp up to meet demand

UberHEALTH – What is it?

Flu shots on demand

Uber users request a flu shot from their mobile app

Driver delivers the nurse and vaccine to their doorstep

Nurse can administer as many as 10 flu doses per stop

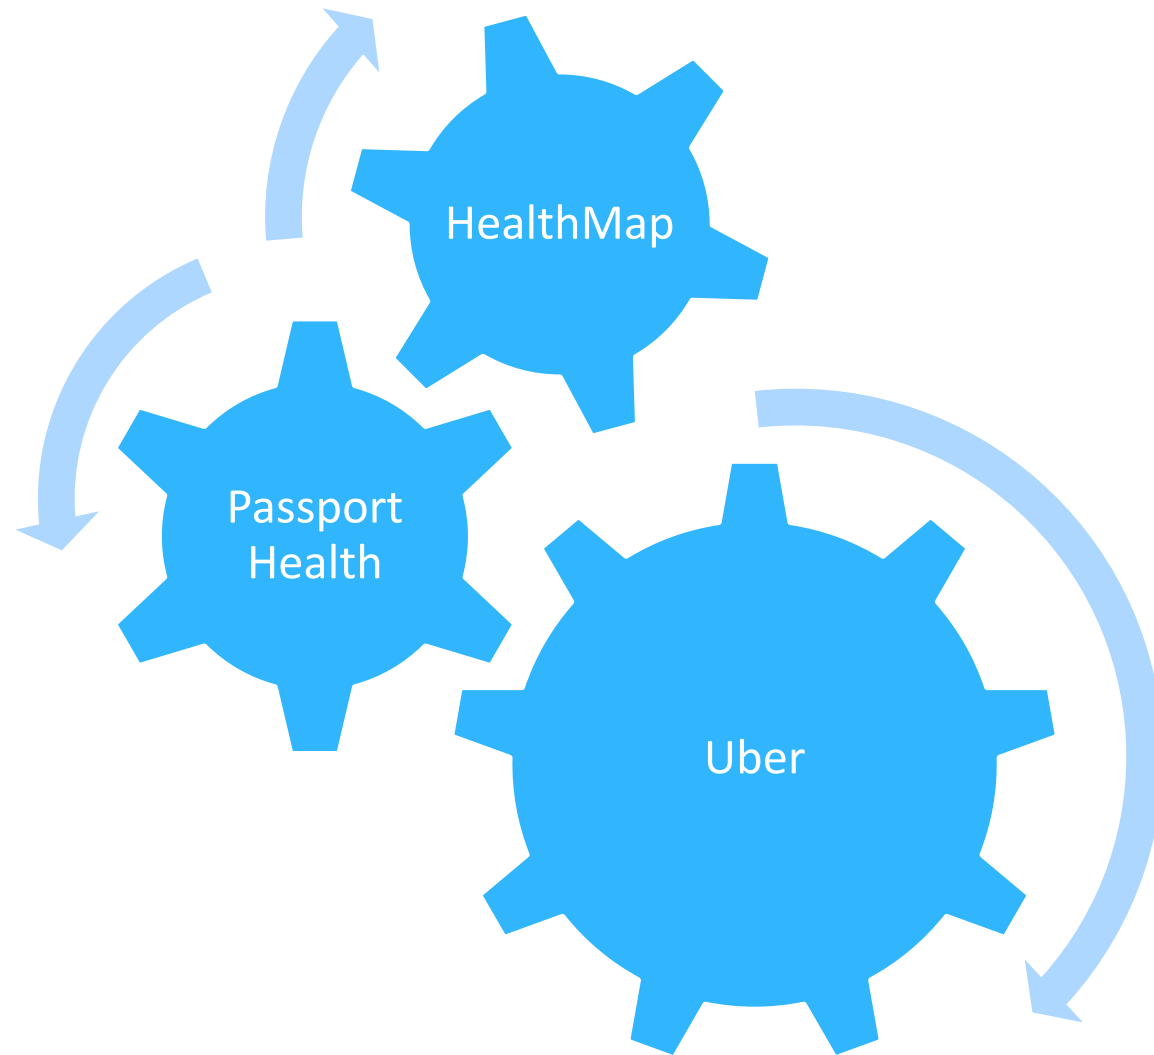

UberHEALTH

Debuted in 2014 with events in Boston, Washington DC, New York City, and Chicago

Grew in 2015 to include events in 25 cities across the US with 250 nurses – all on one day

UberHEALTH – A true partnership

Logistics - Delivering vaccines on the go

Considerations and Challenges

Vaccine storage and maintaining cold chain in transit

Estimating vaccine inventory needs + re-stock options

Handling potential adverse reactions outside clinic setting

On-the-go storage and handling of protected health information and hazardous waste

Ensuring confidentiality for users of the UberHEALTH app

UberHEALTH – What was the impact?

Findings from 2014 pilot in four cities

Vaccines were requested at 2,378 sites

Nurses vaccinated 2,057 persons

Post Event Survey

Of the 2,024 persons who were sent surveys, 486 (24%) completed and returned them.

Respondents indicated that they were definitely likely (30.2%), somewhat likely (50.0%), or definitely not likely (19.8%) to receive the vaccine from traditional providers.

Respondents also said that the delivery of the vaccine was very important (78.2%), moderately important (15.6%), or not important (6.2%) to their decision to be vaccinated.

UberHEALTH - Goals and objectives

Reimagining how we deliver immunizations

Developing a demand for vaccines among hard-to-reach targets

Shifting the medicine delivery paradigm
