

**Jeffrey Silvers MD**  
**Medical Director of Pharmacy and Infection Control**  
**Sutter Health**

Dr. Sutter has more than 30 years of active practice in Infectious Diseases. He has practiced clinical infectious diseases in the hospital and outpatient setting since completing his fellowship in the UCLA system in 1982 until 2014. Through my various call arrangements, he has been on staff and worked at more than 10 different acute care and LTAC hospitals in the San Francisco bay area. His main experience has been with hospitals <250 beds in size.

After serving as the chair of pharmacy and infection control committees at multiple facilities since 1985, he ultimately became the system medical director of Sutter Health for Pharmacy/Therapeutics and Infection Control. Through his leadership position in Sutter Health and as the chair of the CDPH HAI advisory committee, he has promoted immunizations throughout the state of California as an important piece of antimicrobial stewardship.
