

How to Use the #FluFighter Social Media Graphic PowerPoint Template

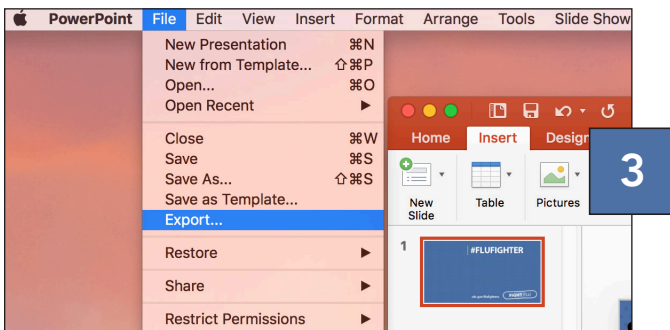

STEP 1: INSERT YOUR PHOTO

Open the PowerPoint template, and then click on the **Insert** tab. Then click on the **Pictures** button and choose to insert **Picture from File**, and then select the photo you wish to insert into the template.

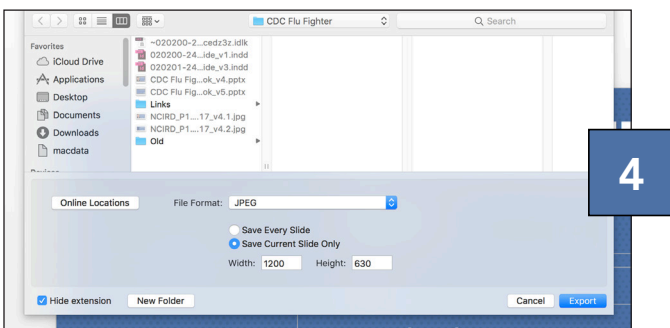

STEP 2: ADD YOUR COPY

Click on the **Name** text box and enter the first and last name of your Flu Fighter. Please keep the full name on one line. If the name of the Flu Fighter extends to two lines, reduce the font size. Do not change the font type, which should be Myriad Pro Bold.

STEP 3: CHOOSE YOUR FILE FORMAT

Share your image on social media by exporting it as a JPEG. Click **File**, then **Export**, and then select the file format as **JPEG**.

STEP 4: EXPORT YOUR IMAGE

Once you have selected the file format, you can export multiple slides at one time by clicking the **Save Every Slide** button under File Format. If you have only one Flu Fighter image, click the **Save Current Slide Only**. Do not change the Width and Height settings. Click the **Export** button to generate your image.
