

Building Vaccine Confidence Through Collaboration

By forging powerful partnerships across communities, we're amplifying trusted voices and delivering real impact.

We teamed up with the **EXCITE Extension Foundation** to create a vaccine toolkit tailored for Native American communities.

With **NHMA**, we helped launch Spanish-speaking health clinics to serve communities that are often left behind.

We collaborated with the **Rhode Island Department of Health** to tailor an impactful campaign for flu clinics across the state.

United voices. Shared goals. Real impact.

Together, we're breaking barriers, confronting misinformation head-on, and building a healthier, more informed future—one partnership at a time.
