Community Health Workers and Promotores are the Heart of Health Education
The Proof is in the Data

Home visits from P/CHWs or other frontline public health workers have been shown to increase vaccination by a median of 11 percentage points.

P/CHW Pilot Program: Training Modules

**Overview**

1. The Past, Present, and Future of Vaccination
2. The Nuts and Bolts of Vaccines
3. How to Debunk Misinformation and Bolster Vaccine Confidence
4. Addressing Social Determinants of Health and Barriers to Vaccination
The Pilot: Texas CHWs

- Over 200 CHWs completed all four modules from March 18-April 25, 2022:
  - 100% said the training increased their confidence in their ability to talk about vaccines.
  - 100% said the training increased their confidence in their ability to connect people to vaccine services.
  - 91% said they expected to use the information learned during the training.

The Pilot: Texas CHWs

- In the two-month follow-up survey:
  - 79% of P/CHWs reported having stronger, more productive conversations as a result of the training.
  - 70% of P/CHWs reported using information from the training to connect people to vaccination services.

In the two months following the course, P/CHWs went on to talk to 4,000+ people about vaccines and connected 2,000+ people to vaccination services.

“When I make my calls, I seize the opportunity to talk to members of the community and better inform them on the importance of getting the vaccine and also answer questions they may have.” — Community Health Worker in Galveston, TX
