

Emily Acker, MPH

Senior Director, Infectious Disease Policy
Biotechnology Innovation Organization (BIO)

Emily Acker is currently the Senior Director, Infectious Disease Policy at the Biotechnology Innovation Organization (BIO). In this role, she works with member companies engaged in vaccines to build consensus and advance policy, legislative, and regulatory priority issues at the state and federal level.

Prior to joining BIO, Emily worked in health economics and outcomes research consulting, primarily in the rare disease and oncology space, helping clients develop value propositions, launch strategies, and leverage patient reported outcomes for coverage decisions. She also previously worked on an HPV vaccination program designed to increase HPV vaccination rates in Colorado through a health systems quality improvement approach. Emily earned her MPH from Dartmouth College and her BS from Tulane University.
