

**Kelley Raines, MPH**  
**Senior Epidemiologist**  
**Vaccine Preventable Diseases Branch**  
**Division of Viral Diseases**  
**Centers for Disease Control and Prevention**

Kelley Raines, MPH, is a senior epidemiologist in the Vaccine Preventable Diseases Branch within the CDC's Division of Viral Diseases in Atlanta, Georgia. Her work focuses on the epidemiology, surveillance, and prevention of measles, with an emphasis on outbreak investigation and response in the United States.

She contributes to CDC analyses, publications, and guidance on measles transmission, including national surveillance and outbreak investigations in complex settings. Her work supports public health responses and informs strategies to improve case detection, vaccination coverage, and outbreak control, translating epidemiologic data into actionable public health practice.
