Respiratory Virus Laboratory Emergency Department Network Surveillance (RESP-LENS)
Number of Specimens Tested and Percent Positive by Week

National Level

https://www.cdc.gov/surveillance/resp-lens/dashboard.html
Weekly Rates of Respiratory Virus-Associated Hospitalizations by Season

Dashed lines for the current season indicate potential reporting delays, and interpretation of trends should exclude data from recent weeks. Combined hospitalization rate for influenza, COVID-19, and RSV reflects rates during the active surveillance period for each pathogen (see footnote).

Weekly Rates of Respiratory Virus-Associated Hospitalizations by State: Georgia

Dashed lines for the current season indicate potential reporting delays, and interpretation of trends should exclude data from recent weeks. Combined hospitalization rate for influenza, COVID-19, and RSV reflects rates during the active surveillance period for each pathogen (see footnote).

Data last updated: September 28, 2023. | Accessibility: Right click on the graph area to display options such as show data as table and copy visual.

Resources

• **Respiratory Virus Laboratory Emergency Department Network Surveillance (RESP-LENS)**
  This interactive dashboard tracks emergency department visits for laboratory-confirmed severe acute respiratory coronavirus type 2 (SARS-CoV-2), influenza (flu), and respiratory syncytial virus (RSV).

• **Respiratory Virus Hospitalization Surveillance Network (RESP-NET)**
  This site comprises three platforms that conduct population-based surveillance for laboratory-confirmed hospitalizations associated with COVID-19, Influenza, and Respiratory Syncytial Virus (RSV) among children and adults.

• **National Emergency Department Visits for COVID-19, Influenza, and Respiratory Syncytial Virus**
  This site provides a combined view of emergency department visit data for multiple respiratory conditions as tracked by the National Syndromic Surveillance Program (NSSP).
