

**Nandini Selvam**  
**Vice President**  
**General Manager**  
**IQVIA Government Solutions**

Nandini Selvam is Vice President and General Manager of IQVIA Government Solutions, a wholly owned subsidiary, within the US business unit, overseeing business and scientific strategy. A trained epidemiologist, Nandini has worked extensively across disease areas including vaccines, infectious diseases, chronic conditions, and global and domestic health policy. Her career spans academic research (Rutgers U/NJ Medical School Global Tuberculosis Institute), the U.S. federal government (CDC), pharmaceutical industry (Merck), health insurance (Anthem/WellPoint), and health services (IQVIA). At the CDC, she also served as a Commissioned Corps Officer in US Public Health Service, during her tenure as an Epidemic Intelligence Service (EIS) Officer or “Disease Detective”, the oldest and most prestigious federal fellowship in the US.

Nandini is the co-author of more than 30 peer-reviewed publications. Her work has been recognized with several honors, including the Stuart Cook Award for Outstanding Doctoral Dissertation, Anthem’s Winning Leaders Program, and Ragas Dental School’s Epidemiologist Award. She has also served on the White House Forum on Antimicrobial Stewardship, and is currently on the Steering Committee for the World Economic Forum’s Global Alliance for Women’s Health, and Milken Institute’s Women’s Health Network.

Nandini holds a PhD in Epidemiology, a Master of Public Health in Urban Populations & Environmental Health, and Health Policy, and a Bachelor’s degree in Molecular Biology and Biochemistry from Rutgers University.
