

Christine Shaw, PhD
VP, Portfolio Head Respiratory Vaccines
Moderna

Christine is the Portfolio Head of Respiratory Vaccines at Moderna with oversight of RSV, influenza, and respiratory combination vaccine development. In her 8 years at Moderna she has also held other roles including Director of Immunology, Sr. Director of Translational Research, VP of Early Development Programs, as well as Program Leader for multiple vaccine programs including RSV. Prior to Moderna, Christine was the Research Program Leader for RSV vaccines at Novartis. Christine earned her PhD in Microbiology and Molecular Genetics at Harvard University, and her undergraduate degree in Biochemistry at Brown University.
