

Vaccine Integrity Project Update and Discussion

October 16, 2025

Background

- Launched in April 2025, CIDRAP's Vaccine Integrity Project is dedicated to safeguarding vaccine use in the U.S. so that it remains grounded in the best available evidence.
- To date, the Vaccine Integrity Project is supported by an unrestricted gift from Alumbra, a foundation established by philanthropist Christy Walton.

Opportunities for Action: What we heard from the community

- Strengthening communication and improving information dissemination for today's environment
- Developing and disseminating clinical tools and guidelines
- Building an overarching coalition for strategy and alignment
- Maintaining the nation's vaccine infrastructure
- Stabilizing the vaccine safety system
- Providing assistance to state and local health departments
- Safeguarding insurance coverage
- Continuing the flow of data for decision-making

The Vaccine Integrity Project

Providing trusted, science-based information to empower individuals, families, communities, clinicians, and policymakers to make informed vaccine choices.

- **Focus:** Scientific evidence available to evaluate the safety and effectiveness of current (and new) immunizations
- **Purpose:** Communicate, both proactively and reactively, available evidence around immunizations and vaccine preventable diseases
- **Audience:** healthcare providers, professional medical societies, health systems, public health, insurers/payors, media, policy makers, and the public at large

The Vaccine Integrity Project

Piece of the Puzzle: Priority Focus Areas

- **Summarizing and Disseminating Scientific Evidence:** Continue to summarize and broadly share available science to support evidence-based immunization recommendations.
- **Rapidly Communicating Information:** Increase frequency, breadth, and depth of the communication around the safety and effectiveness of immunizations.
- **Enhancing Collaboration and Visibility:** Continue informal outreach to wide variety of organizations to improve coordination, reduce duplication, and identify and address emerging issues.

Summarizing and Disseminating Scientific Evidence

- Evidence base for this **respiratory season** has been shared broadly
 - Collaboration with medical societies continues
 - Webinar held to share findings in August
 - Interactive tool and data access launched in October
 - Manuscript, high-level summary, more webinars forthcoming
