## Partnering for Vaccine Equity (P4VE)

Through the *Partnering for Vaccine Equity* program, CDC aims to improve equity in adult immunization across disproportionately affected populations, including racial and ethnic minority groups, through partnerships to drive community-level action.

**Funding to partners on the ground:** CDC has provided \$6.7B to jurisdictions and over \$156M\* million to 500+ partners across national, state, and community levels working in racial and ethnic minority communities

**Technical assistance for partners to accelerate their efforts:** CDC provides hands-on support through peer-learning sessions, expert and 1:1 coaching, materials sharing, and data analytics support

**Guidance and communications for funded partners, Immunization Awardees, and other stakeholders:** CDC develops guidance, communications, and resources to share vaccine information, best practices, and strategies

\*This does not include an additional \$150M to fund other partners supporting vaccine equity for other disproportionately affected adult populations

### Webinar: Flu and COVID-19 Vaccines 101: Just the Facts

When: Nov 4, 2021 from 14:00 to 15:00 (ET)  
 Associated with: Full Community

**Partnering for Vaccine Equity**

**Learning Community Event Announcement!**

Webinar: Flu and COVID-19 Vaccines 101: Just the Facts  
 Thursday, November 4th 2:00 - 3:00 pm ET  
 NOTE: This event was rescheduled from October 28th to accommodate a related REACH AME webinar on October 27th. Sharing Flu and COVID-19 Resources.

The Learning Community for the Partnering for Vaccine Equity Program is pleased to announce a November 4th learning event for funded partners and others working on vaccine equity.

**What We'll Cover:** During this learning session presented by Learning Community partners from the Association for Immunization Managers (AIM) and REACH, featured speakers Dr. Yabo Beyellow and Lisa Jacques-Cameli will provide an overview of flu and COVID-19 diseases and vaccines and explain why being vaccinated during flu season is so important.
