- Other items from the membership
- Next meeting – October 13:
 - Closed session from 1:00 – 2:00 pm ET
 - Public meeting from 2:00 – 3:00 pm ET

Opening statement

SAVRR Council Scope and Objectives

SAVRR stands for the Summit Adult Vaccination Recommendations Review; accordingly, this group is the SAVRR Council.

Because the Summit covers influenza vaccination across the lifespan, the Council will address influenza recommendations across all ages in addition to adult vaccination recommendations.

Objective 1: Provide stakeholder feedback on recommendations

- The Council will serve as a forum—similar to the function that was previously provided by the liaisons to the ACIP—to provide stakeholder feedback to recommendation-developing bodies (currently the medical societies and professional organization who are members of SAVRR) during development and, as needed, after publication.

Objective 2: Support implementation of evidence-based recommendations

- The Council will provide guidance to support effective clinical implementation of evidence-based vaccine recommendations from professional medical societies and ACIP, as appropriate.
- This work includes identifying and clarifying differences among recommendations; highlighting gaps and opportunities for alignment; identifying interventions for the Summit's working groups and its partners; and helping to disseminate clear, practical guidance through the National Adult and Influenza Immunization Summit (NAIIS) communication channels.

AMA/VIP Summary of evidence review and sharing tools/resources

Sara Pritchard and Andrea Garcia- AMA
